SUMMARY

Laravel Developer with 3+ years of hands-on web development experience, including **2+ years of practical Laravel development** through professional work and independent projects. Experienced in building eCommerce, POS & inventory, project management, and CMS applications using Laravel, PHP, MySQL, REST APIs. **Available immediately for remote, hybrid, or on-site roles.**

TOP PORTFOLIO PROJECTS

Ecommerce Platform - [Deployed](#)

- Built a complete Laravel online store with dynamic product variants and attributes, cart and coupon workflows, order processing, and automated stock updates.
- **Tech:** Stripe API, database locking (lockForUpdate), Laravel Reverb, queues & jobs, Spatie Permissions, AJAX filtering, Laravel Scout live search, rate limiting.

Point of Sale (POS) & Inventory System - [Deployed](#)

- Developed a POS and inventory system covering suppliers, purchases, sales, automatic stock tracking, profit-margin pricing, and reporting.
- **Tech:** Laravel, MySQL, AJAX, Spatie Roles & Permissions, Database Transactions, Inventory Management

Project Management System - [Repository](#)

- Built a multi-user project management platform with role-based dashboards (Admin, Manager, Member) for task assignment, commenting, and reporting.
- **Tech:** Laravel, MySQL, Laravel Passport, Policies, Custom Guards, RBAC, REST APIs, PHPUnit, AJAX, Eloquent Relationships

Tutorials & Learning Platform - [Deployed](#)

- Developed and deployed an SEO-focused educational platform with course management, Adding tools and a custom blog/CMS.
- **Tech:** Laravel, Livewire, MySQL, Spatie Roles & Permissions, SEO, CMS

Imperial Ride - [Deployed](#)

- Designed the responsive frontend and contributed to backend modules for a vehicle booking website, with focus on usability and performance.
- **Tech:** Laravel, MySQL, custom UI/UX, responsive frontend, performance optimization.

WORK EXPERIENCE

Web Developer & Manager — OPEA Gojra

Oct 2023 – July 2026

- **eCommerce Development:** Developed core online store features and optimized backend queries and assets to improve site speed and performance.
- **ERP & Integration:** Collaborated with senior Laravel/ERP developers to implement product, variant, and stock synchronization, reducing manual data-entry errors and improving inventory accuracy across the platform.
- **QA & System Support:** Identified technical bugs, coordinated issue resolution with the core team, and optimized workflows to ensure a smooth shopping experience for customers.

Independent Laravel Projects

2023 – Present

- **Development:** Built complete Laravel applications including eCommerce, POS/inventory, project management, learning platforms and Laravel with react projects.
- **Deployment:** Managed Git-based version control workflows, server environment configurations (.env), shared-host deployments (cPanel/Hostinger), database migrations, and production troubleshooting.

Junior Laravel Developer — BriskBase Software House, Gojra

Oct 2022 – Sep 2023

- **Full-Stack Development:** Developed and maintained client-facing Laravel web applications using PHP, MySQL, Blade, and Bootstrap to deliver responsive, dynamic user interfaces.
- **Collaboration & Delivery:** Collaborated with senior developers to debug issues, execute code changes, and reliably deliver production updates for client web applications.

TECHNICAL SKILLS

- **Backend Development:** PHP, OOP, Laravel, MVC, Routing, Middleware, Dependency Injection, Service Container, Form Requests, Authentication & Authorization, Policies, Guards, RBAC, CRUD, File Storage, Email.
- **Database:** MySQL, Eloquent ORM, Query Builder, Relationships, Migrations, Seeders, Factories, Transactions, Eager Loading, N+1 Query Resolution, Soft Deletes, Query Optimization
- **APIs:** RESTful APIs, Laravel Sanctum, Laravel Passport, API Resources, 3rd party API Integration, Postman, Rate Limiting
- **Frontend:** HTML5, CSS3, Bootstrap, Blade, jQuery, JavaScript, React.js - Basic (Components, Hooks, API Integration).
- **Testing & Debugging:** PHPUnit, Tinker, Log Analysis, Browser DevTools, Exception Handling, Production Troubleshooting.
- **Tools & Deployment:** Git, GitHub, CI/CD, SSH, cPanel, Hostinger, Composer, Environment Configuration, Git-based Deployment, Laravel Production Deployment.
- **AI-Assisted Development:** GitHub Copilot / Cursor / ChatGPT for code assistance and debugging
- **Architecture & Practices:** SOLID Principles, Service Classes, Repository Pattern, Separation of Concerns, Database Transactions, Agile/Scrum, SDLC

EDUCATION

- **BS Software Engineering** — Virtual University of Pakistan
2026 – Present
